No. 10 - September 2017

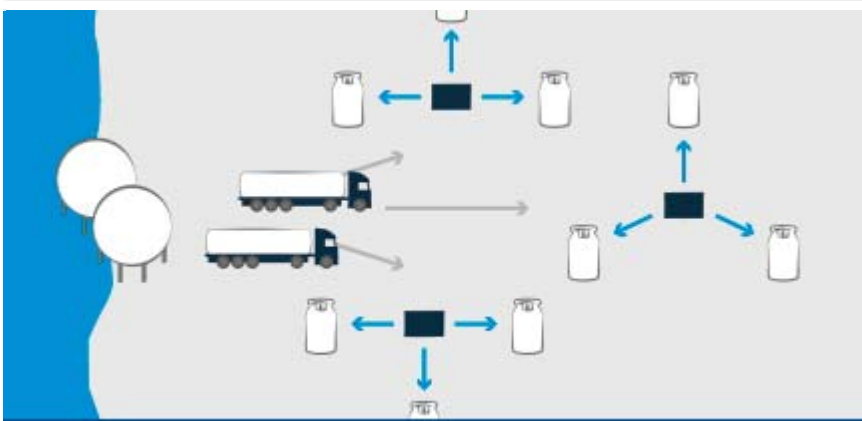

### Our off-grid package

LPG is an attractive fuel in areas with limited electricity, where it can be used for cooking, heating, and powering generators. But because of the limited access to power, the filling of cylinders is often done far away, in large filling halls where the energy grid is more stable. An off-grid filling solution is a great way to circumvent this problem and get closer to the consumer.

### Why should you choose off-grid filling?

### Did you know?

3.6 billion people across the world have only partial or NO access to electricity.

### Meet KC ProSupply at the 30th World LPG Forum

You can hear and see much more about our off-grid filling solutions at the 30th World LPG Forum in Marrakech, Morocco, from **3-5 October 2017**.

Find KC ProSupply at the Palais des Congrès in **booths 61-62-63**.

Mr. Christian Fredberg, Mr. Filipe Pinto and Mr. Amar Al-Karradi look forward to meeting you there!

Even though the capacity is low, there are many things to gain from an off-grid filling plant. Here are some of the biggest advantages that you can expect to see.
